Dear Sir:

Petitioner submits that the final Office Action dated November 3, 2010 improperly presents new grounds of rejection. Under M.P.E.P. §706.07(a), an Office Action is not properly made final if new grounds are presented, and under *Hyatt v. Dudas*, a ground of rejection is not simply the statutory requirement the claims are rejected under, such as § 102, but also the precise reason why the claim is asserted to fail the requirement. 551 F.3d 1307, 1312 (Fed. Cir. 2008) (“a ‘ground of rejection’ for purposes of Rule 1.192(c)(7) is not merely the statutory requirement for patentability that a claim fails to meet but also the precise reason why the claim fails that requirement.”). Specifically, the current Office Action presents, for the first time, assertions by the Examiner that the interrogation signal 20 of the ‘099 reference corresponds to the claimed confirm command and that the ‘099 reference also teaches a different integration signal including a short repeat message that corresponds to the claimed repeat command not containing synchronization information. Applicant has not had an adequate opportunity to consider, address and/or rebut these assertions. Accordingly, the finality of the current Office Action is improper and should be withdrawn.
